

Quick Connect Fittings,
Manifolds, & Valves

A Subsidiary of Watts Water Technologies, Inc.

New from Sea Tech: IAPMO Certified Fittings

Sea Tech manufactures the most extensive plumbing line with the approvals for Copper, PEX, and CPVC pipe. Available in 3/8", 1/2", 3/4", and 1" fittings.

The 35 Series Sea Tech fittings listed below have passed IAPMO testing. With the IAPMO certification, these fittings are approved for domestic and commercial applications for both potable water distribution systems and hydronic heating systems. These fittings can also be utilized in underground applications and behind the wall plumbing. To be installed in accordance with Sea Tech's instructions and the latest edition of the Uniform Plumbing Code.

Manufactured in compliance with IAPMO IGC 188-04c.

If PEX tubing is used, then a tube support liner must be used also. The tube support liner acts as an internal support for the end of the tubing. When cutting tubing, ensure that the ends are cut square and are free of burrs. Ensure that there are no scratches, gouges or any form of damage on the circumference of the tubing within 1 in. (25.4 mm) of the cut end. Damage in this area may cause leakage. Check the fitting for any signs of damage or foreign objects. Ensure that the tubing is

pushed into the fitting fully and is engaged properly in accordance with the manufacturer's instructions. When a joint has to be disassembled and then reused, ensure that the tubing removed from the joint has no damage on the circumference with 1 in. (25.4 mm) of the end. Inspect the tube and fitting for any signs of damage and ensure they are free of foreign materials. The joint can then be reassembled.

Tube Support Liner's
